

SHIVRAJ SINGH RATHORE

QA Engineer | Salesforce | AI-Powered Testing

+91 7790931957 | connect.shivrajrathore@gmail.com | [Salesforce Trailhead](#) | [LinkedIn](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Results-oriented Hybrid QA Engineer with around 5 years of experience in software testing across Web, Mobile, and Salesforce CRM platforms (Sales Cloud, Service Cloud, CPQ). Demonstrates deep expertise in functional, non-functional, API, AI-assisted, and end-to-end testing using industry-standard tools including Postman, Selenium, Playwright, QTest, Jira, Opkey, Workbench, ChatGPT, Claude, Gemini, Cursor, OpenAI Codex, AI coding models, MCP-enabled workflows, AI agents, and AI-powered testing solutions to accelerate quality engineering and delivery.

Proven track record across Salesforce Lead-to-Cash implementations with strong expertise in Sales Cloud, Service Cloud, and CPQ testing, covering Lead Capture, Lead Qualification & Enrichment, Opportunity Creation, Product Configuration, Quote Generation, Pricing Engine Validation, Discount Rules & Approval Workflows, Bundling, Contract Generation, Order Activation, Billing, Invoice Generation, and Payment Processing. Experienced in Selenium and Playwright automation, AI-driven test automation, end-to-end framework development using AI, AI agent creation, MCP servers and integrations, and validating complex business workflows while ensuring data integrity, business rule accuracy, and seamless system integration.

Experienced in test automation, CI/CD pipeline integration, SQL/SOQL data validation, AI-powered test optimization, and leveraging agentic AI workflows to improve engineering productivity, automation coverage, and software quality. ISTQB certified (2x) and Salesforce certified (4x), consistently delivering high-quality, production-ready software within Agile frameworks while effectively utilizing modern AI engineering tools to accelerate development, testing, and continuous delivery.

CORE COMPETENCIES & TECHNICAL SKILLS

Testing Types: Functional, Regression, Smoke, Sanity, UAT, Integration, End-to-End, API, Performance, Unit, Exploratory

Salesforce Clouds: Sales Cloud, Service Cloud, CPQ, Experience Cloud and Other Clouds

Test Automation: Selenium WebDriver, Playwright, Opkey (No-Code), AI-assisted Test Optimization

API Testing: Postman, REST APIs, SOAP, JSON/XML Validation

CI/CD & DevOps: Git, GitHub, Jenkins, CI/CD Pipeline Integration, Agile/Scrum, SDLC, Continuous Testing

Test Management: QTest, Jira, Zephyr, TestRail, Defect Lifecycle Management, Test Plan

Data & Query: SQL, SOQL, Salesforce Workbench, Data Loader, Data Validation

Salesforce Tools: Salesforce Workbench, Salesforce Inspector, SOQL Builder, Developer Console, Setup Audit Trail

Programming: Java Selenium, JavaScript (basic), TypeScript (basic), Python (basic), XML, JSON, HTML, CSS

Domain Knowledge: Lead-to-Quote (L2Q), Quote-to-Cash (Q2C), Billing & Payments, CPQ Pricing Logic, Healthcare Management, AI/ML Integrations, Voice/Speech AI, CRM Workflows

Methodologies: Agile, Scrum, Kanban, V-Model, Waterfall, BDD (basic)

Soft Skills: Leadership, Cross-functional Collaboration, Adaptability, Time Management, Process Optimization

PROFESSIONAL EXPERIENCE

Software QA Engineer | Metacube Software Pvt. Ltd.

June 2022 – Present

- Led QA across Salesforce Sales Cloud, Salesforce Service Cloud, and Salesforce CPQ projects, delivering end-to-end validation of key business workflows including lead management, opportunity lifecycle, case handling, billing, quote generation, and renewals. Designed and executed complex CPQ test scenarios covering bundling, pricing rules, discount approvals, and amendment/renewal flows, while ensuring data integrity through SOQL-based backend validation. Acted as the sole QA for an AI Data Enrichment initiative and led QA for a speech-to-text (Vaani) integration, validating AI-driven data population, transcription accuracy, and cross-system data flow. Managed the full QA lifecycle using Jira and QTest, supported CI/CD-driven regression cycles, and performed API testing via Postman with OAuth 2.0 validation. Collaborated with developers and architects on defect resolution and CPQ configurations, validated Salesforce admin components post-deployment, tested Aircall CTI integrations, and leveraged Opkey to optimize automation and reduce regression effort.

- Performed end-to-end software testing for a vehicle software management application, covering functional, UI, API, and backend testing across vehicle management, user management, service scheduling, billing, and third-party integrations. Designed and executed test cases and test plans, performed cross-browser and device UI validation, and conducted REST API testing using Postman to verify payloads, authentication, and data accuracy. Validated backend integrity through SQL-based testing and identified discrepancies between UI and database layers. Worked within Agile sprints, managed defects through Jira, and executed regression, smoke, sanity, and UAT testing before releases while maintaining traceability matrices and test summary reports. Gained practical exposure to CRM workflows, customer data management, service interactions, and customer-related integrations.

KEY PROJECTS

Core Sales – CRM & CPQ (Salesforce Sales Cloud)

- Validated complete Sales Cloud CRM workflows: lead-to-opportunity, opportunity-to-quote, CPQ pricing, approvals, and order generation.
- Tested advanced CPQ features including configuration attributes, product options, price rules, discount schedules, and contract amendments.

Billing & Payments (Salesforce Service Cloud)

- Conducted functional and integration testing of billing workflows, payment gateway connections, invoice generation, and credit memo processes within Service Cloud.

Vaani – Speech-to-Text AI Integration in Salesforce

- Sole QA resource for AI-driven voice transcription product; built test cases for voice capture accuracy, NLP entity extraction, and Salesforce record auto-population.
- Validated integration touchpoints across speech engine, middleware, and Salesforce CRM objects.

Lead Enrichment AI (Salesforce)

- Tested AI-powered lead enrichment tool — validated data accuracy, field population logic, enrichment trigger conditions, and UI consistency in Salesforce.

Aircall CTI Integration with Salesforce

- Validated telephony-CRM integration including call logging, screen-pop functionality, task creation, and reporting accuracy.

Vehicle Service & Insurance Mobile Application

- Performed end-to-end mobile application testing on Android and iOS platforms, covering functional flows, UI validation, API integration tests, and regression cycles.

VCP Website (UK Healthcare)

- Led QA for UK-based healthcare platform; executed functional, regression, and cross-browser testing to ensure GDPR-compliant data handling and user experience consistency.

CERTIFICATIONS

- | | |
|---|---|
| • ISTQB Certified Tester – Foundation Level (CTFL) | • Salesforce Certified Associate |
| • ISTQB Certified Tester – Foundation Level Agile Extension (CTFL-AT) | • Salesforce Certified AI Associate |
| | • Salesforce Certified Platform Foundations |
| | • Salesforce Certified Platform Administrator |

EDUCATION

Master of Computer Applications (MCA) 2022

University of Technology

Bachelor of Computer Applications (BCA) 2019

Jaipur National University
